we are in the moulding business

We mould children for their future. To ensure the best of results we utilize lots of love, care and affection. Our mouldings are guaranteed to provide a fuller and richer childhood. We believe that every child has a right to grow and develop in the best possible manner.

OK PLAY, a British company was taken over towards the end of 1992 and established in India as a fully owned entity. In a span of just over ten years, OK PLAY has grown to be the largest manufacturer of plastic moulded toys, playground equipment and children furniture in the country.

Today OK PLAY products are distributed all over the country through a network of over 50 distributors servicing almost 8000 retailers. OK PLAY's manufacturing facilities located at Sohna , Haryana are at par with the worlds finest. The fully integrated state of the art plant has the latest generation fully computerised machines for mould design and fabrication, all types of plastic moulding, post moulding facilities and an assembly line. The sophisticated facilities operated by trained experienced professionals ensure precise mouldings resulting in a quality that measures up to the finest in the world.

OK PLAY is not just another brand. It is a whole new approach towards children. Each product is created with the belief that playing with a toy should be as much education as fun. While each toy is designed to make a kid jump with joy, it is also meant to impart a process of learning, an understanding of how things work, as well as to foster group interaction. After all, the child is the father of man. And no one understands this better than OK PLAY.
